

Every Home Needs A **Quality Honey**

Nature's Way®

Everyone tasted honey before.
In fact, almost every home have a bottle of honey.

**How to avoid buying fake
and adulterate honey?**

**How to choose the
right honey for me?**

**Is there more
to honey than
sweetness?**

Honey Facts

- ◆ It is the only food that includes all the substances necessary to sustain life.
- ◆ It comes in many flavours and colours.
- ◆ It will not spoil (but may change in taste and smell).
- ◆ Among all types of honey, only Manuka honey is referred to as medicinal honey.
- ◆ Manuka honey contains high antibacterial activity that helps relieve various irritations and health problems.

PURE HONEY

Honey can be differentiated into 3 types as stated below.

Recommended to choose Pure Honey for therapeutic benefits, safety and quality.

Type	Conditions	Advantages & Disadvantages
<div>RAW</div> 	<ul style="list-style-type: none">• No additives.• No processing.• Higher priced.	<ul style="list-style-type: none">• Short shelf life (> 3 months), to be taken immediately after harvest.• High risk of fermentation that will change its taste, color, quality and safety.
<div>PURE</div> 	<ul style="list-style-type: none">• No additives.• Minimal processing (e.g usually is heating and filtration).• Lower priced than Raw honey.	<ul style="list-style-type: none">• Longer shelf-life with low risk of fermentation.• All natural properties (enzymes, bio-active components) are intact.• Suitable for therapeutic use and promote good health.• Risk of fake and adulteration (choose from reliable sources).
<div>NATURAL</div> 	<ul style="list-style-type: none">• Most common and lower priced than Pure Honey.• May contain other ingredient or additive (e.g sugar, corn syrup, flavouring).	<ul style="list-style-type: none">• Minimal health benefits.• More for pleasure eating as it taste sweeter with more flavours to choose.

PURE

Our vision

Every home needs a quality honey.

The Gold Standard in **Manuka Honey**

Nature's Way Australian
Manuka Honey is

- Hand-harvested from pristine Berringa coastal forests and bushland in Australia.
- Pure, unprocessed (only filtered) honey to preserve all bio-active components.
- Each batch is tested for Bio-Active components concentrations.

Pure Gold Australian Manuka Honey

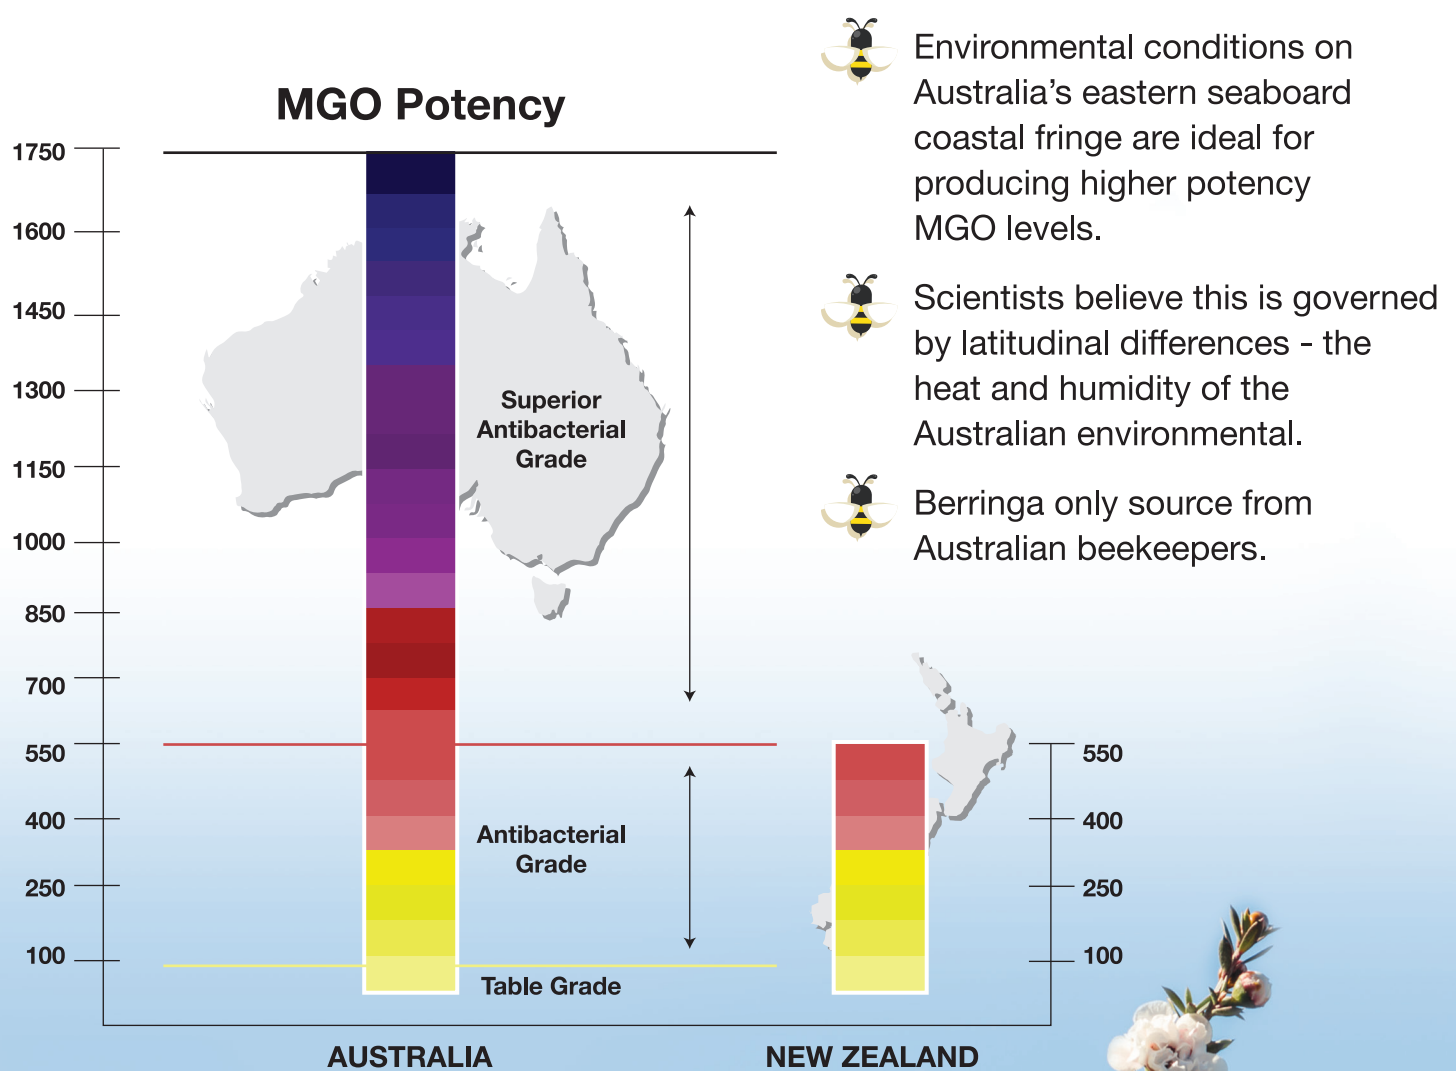

Pure . Bio-Active . Authentic

BIO-ACTIVE

Bio-Active Australian Honey

- Australia is home to 83 of the 87 known Leptospermum species worldwide. Only one species is found in New Zealand.
- This variety of species plus Australia’s warmer climate enable the bees to produce honey with higher amounts of bio-active components methylglyoxal (MGO) compared to New Zealand.
- This fact has since been acknowledged by world experts in honey production.

BIO-ACTIVE HONEY

Every Home Needs A Quality Honey.

Using the right honey for the right problem.
